

Tong Heng Engineering Pte Ltd
Corporate Brochure

Introduction

Leveraging our expertise and experience of more than a decade, Tong Heng Engineering Pte Ltd has developed into one of the most recognizable names in the switchgear speciality industry in Singapore, with a major focus in the manufacture of switchboards, control panels/systems and engineering services.

We have built out business model around value creation for our clientele. Over the years, the team of specialists at Tong Heng has developed into field experts in their own right. Today, this business model has seen Tong Heng supplying switchgear-related solutions across a diversified spectrum of market segments such as commercial and residential buildings, industrial process plants, infrastructural development and other industries.

The Company continues to be committed to introducing new and innovative technologies and solutions in the area of manufacturing and assembly of switchgear. Tong Heng continuously invests in R&D and the use of state-to-the-art manufacturing equipment and facilities, while resonating its corporate philosophy of Quality, Service and Value. It's what we do to make this speciality simple.
